POLY LAWN FURNITURE LLC

Quality Crafted Poly Lawn Furniture

2023
PRODUCT CATALOG

The Benefits of Poly Lumber

- Made from 100% post consumer recycled plastic
- Poly Lumber has a UV ray protector to minimize fading
(Some fading may occur over time)
- No maintenance such as painting, scraping or replacing required
- Will not promote bacterial growth or mildew
- Termite resistant
- Will not crack, split, warp, rot or splinter

WARRANTY

10 Years Residential use • 2 Years Commercial Use
1 Year on S.S. Glider arms • 1 Year on Powder Coated Swivels

Quality Poly Furniture by Creekside Features

All stainless steel hardware

Aluminum bracing where needed

Powdercoated Steel Swivels

Products are available in 14 different colors

MADE WITH
TANGENT
SUSTAINABLE LUMBER

For 2-tone furniture

Any color combination is available
1st color is the base & frame,
2nd color is the seat back & arm rests.

WOOD GRAIN PRODUCT

Enjoy the unique look of wood grain while still maintaining all the features of Poly Tuff.

Note: Classic style will have solid color in back for 2-tone.

Birch

Mahogany

Brazillion Walnut

Driftwood Gray

Coastal Gray

MADE WITH
TANGENT
SUSTAINABLE LUMBER

POLYTUF

PolyTuf HDPE plastic lumber is custom-extruded from purified blends of recycled plastics - the kind that come from milk and detergent bottles. Additional proprietary additives are compounded into each product to meet the specifications of each of our customers for their unique applications. UV-inhibited pigments, anti-oxidant processing aids, foaming agents and other compounds are introduced depending on the end use and each customer's performance requirements.

FEATURES

- Manufactured to exacting specifications with tolerances to meet the toughest applications.
- Material is easily machined with any tools appropriate for working with real wood.
- Essentially maintenance free, with exceptional resistance to moisture, fading, insects, splinting, warping and other hazards of environmental exposure common to wood or wood fiber composite products.
- Requires no waterproofing, staining or other similar recurring maintenance other than an occasional washing with soap and water.
- High color stability UV pigment systems which minimize material breakdown from prolonged sun and weather exposure.
- Unlike most wood and wood composite products that quickly fade when exposed to the weather, PolyTuf™ has no wood fibers, retains its vibrant look for years and may fade only slightly over its entire service life.
- PolyTuf™ plastic lumber is well suited for exterior applications where resistance to weathering and minimal maintenance is required, and a quality appearance is essential. PolyTuf maintains its color stability and surface finish over its entire useful service life, and never needs to be sealed, painted or stained.

ENVIRONMENT

Customers concerned about the environment can feel confident that they have made a good decision for the environment by using Tangent products.

Our plastic lumber products are manufactured with a blend of virgin and/or recycled HDPE plastics – the kinds found in milk bottles. In fact, we recycle over 115 million plastic bottles a year - keeping tons and tons of plastics out of landfills every year.

Unlike other types of plastic, HDPE is the most environmentally stable – giving off no harmful fumes into the environment. The Healthy Building Network recommends HDPE resin-based products as the most environmentally friendly plastic building materials.

Our products are designed to hold up to all kinds of adverse weather conditions for decades. And when they are finally ready to be replaced, the materials can be recycled again into new useful products.

CLASSIC

The Classic line features a new profiled back and redesigned arm rests. This line continues our tradition of producing high quality poly lawn furniture in unique styles to fit your lawn decorating needs.
